Re: Water Well Testing Program

The Village of Barrington Hills is participating as a private well water testing bottle pick-up location with the Lake County Health Department.

Our participation makes it less time consuming for our residents to be able to test their well water and comes at no cost to the Village. Previous to this program, a resident would need to drive to Libertyville to pick up a sterile sample bottle, drive home, fill the bottle and then drive again to Libertyville to turn in their sample. The cumbersome process can discourage residents from testing their water.

Now residents can pick up sterile testing bottles at Village Hall so they only need to drive to Libertyville to drop-off their samples for testing.

A reminder that BACOG does a once yearly testing event eliminating the need to drive either way. But for residents who miss this event they now have a convenient alternative.
